

We are pleased to invite you to attend the Satellite Meeting on “Signal Transduction Pathways in Nitrogen-Fixing Symbioses” which will be held on **22nd August 2018** (from 9 to 12h30 am), following the 13rd European Nitrogen Fixation Conference (ENFC) in Stockholm, Sweden. This satellite meeting will provide a privileged frame for presentations, discussions and exchanges around the latest scientific discoveries in plant signal transduction related to Nitrogen-fixing symbiosis, that were not covered during the main ENFC conference.

The meeting will focus on molecular, genetic and *in vivo* dynamic aspects of plant symbiotic signaling, and will offer the possibility to highlight the recent progress in Nitrogen-fixing signal transduction. The meeting is organized at the Stockholm University (Vivi Täckholmsalen), which is easily accessible by extensive rail, bus and tramways networks, making it easy to get access to the main airports in the Stockholm area..

To participate, please register and submit your abstract on the ENFC Conference website. The scientific program will be organized based on abstracts submitted and will include presentations from group leaders, postdoctorant and graduate students.

We are looking forward to welcoming you in this exciting plant-focused satellite meeting!
